

Embassy of Beauty Medical Spa Opens First Middle Eastern Branch in UAE

Internationally Known Celebrity Medical Spa Offers High End Treatments in Dubai Marin

Dubai, February 22, 2013

Embassy of Beauty, an internationally renowned medical spa that combines aesthetic treatments with luxurious spa services, has opened its first branch in the UAE in Dubai Marina. Located in major cities around the globe and known for its celebrity clientele, Embassy of Beauty offers a wide range of customized hair, skin, and nail treatments using products from their own in-house developed skincare line, Biologique Recherche. The medical spa also offers laser hair removal, Botox injections, Derma Fillers, and Slimming treatments.

The opening ceremony was held at The Atlantis Space Ballroom on the Palm Island in Dubai. Dr. Philippe Allouche, Founding Member and Head of Creation Innovation and Research at Biologique Recherche, and Rupert Schmid, the Chairman of the Board at Biologique Recherche were in attendance, as well as Dr. Yana Zemlyanskaya, Medical Director at the spa's Dubai location.

Embassy of Beauty is a luxurious medical spa that places a great emphasis on the individual client, customizing treatments and skincare to suit the individual's needs. "All of our clients go through a "Skin Instant" analysis, which enables us to offer customized treatments to every woman or man," stated Dr. Yana. "All of our doctors have dermatological degrees, our beauticians have DHA licenses, and our employees are trained and routinely updated by French beauticians. We want to ensure that our clients get the highest standard treatments that are just right for them."

Embassy of Beauty's menu of services includes a number of signature favorites, such as the Lotion MC 110 Skin Booster for the face and the Anti-C Slimming Program. The former is a two stage process that enlivens plumps, and tones weak facial skin with signs of aging using products from their exclusive MC 110 line. The initialization and the treatment stages consist of cleansing, lotion, treatment, mask and serum application, and take a total of approximately one hour and a half. The Anti-C Slimming Program is a complete body treatment targeting cellulite and lipolytic areas, improving firmness and micro-circulation. The Slimming Treatment also consists of two stages and last approximately one and a half hour.

"Our products and treatments are backed by decades of science and research, and over the years we have created many innovative treatments that have shown great results in our clients, such as the Lift C.V.S Treatment, which exfoliates, lifts, restructures, hydrates and protects against exterior aggressions" said Dr. Allouche. "We have managed to combine science with luxury to offer a world-class experience, no matter what services the client chooses."

Embassy of Beauty was established in Paris in 1993 by a biologist named Ivan Allouche in the posh Avenue des Champs-Élysées. Allouche also created the science-based skincare line, Biologique Recherche, which is still used and innovated today by his son, Dr. Philippe Allouche, who has worked with the likes of Jennifer Lopez, Angelina Jolie, Sharon Stone, and Madonna.

Dr. Allouche commented on the spa's opening in Dubai: "We are excited to bring the expertise and luxury of Embassy of Beauty to Dubai and to introduce this region to Biologique Recherche. Dubai is renowned worldwide as a luxurious metropolitan city and we are happy to open our doors here."

Embassy of Beauty, or Ambassade de la Beaute, is known for its elaborate décor and lavish boutique spa ambiance, with Swarovski crystal chandeliers and handcrafted furniture. They have established spas in cities around the globe including Hong Kong, Milan, and New York.

About Embassy of Beauty

The Embassy of Beauty or Ambassade de la Beaute was established in Paris situated off the Avenue des Champs-Élysées in 1993 by biologist Yvan Allouche, who also founded cosmetics line Biologique Recherche . The Embassy of Beauty is a medical spa for both ladies and gentlemen, that offers aesthetic treatments combined with spa services which includes a range of treatments for face, body and hair.

The spas skin treatments includes facials with boosters, facials with skin remodeling machine, signature BR Lift C.V.S and Soin Restructurant et Lissant treatments for body and face. Body treatments include peels, body wraps, and unique combinations of massage techniques, technologically assisted cosmetic procedures, and injection techniques which are also in high demand.

Only doctors, and beauticians with Dermatological degrees and DHA licenses, are allowed to work in the Spas. All staff members are regularly trained by French beauticians. Embassy of Beauty has spas in New York, Paris, Moscow, Hong Kong, Milan, and Riga and recently in UAE.
